

# Eyes on Eagles: Nest Viewing in the Parks

*In an initiative to grow awareness, appreciation and awe of this state-listed species, the Park Commission, Conserve Wildlife Foundation, PSE&G and the Wildlife Center Friends have formed a partnership to bring bald eagle educational programming and experiences to our community. Throughout this breeding season, and beyond, join us for public outings, school field trips and adult lecture series throughout park facilities and local schools.*

## Eyes on Eagles: Nest Viewing

Fridays; February 8 - May 10

1-3pm

South Shore of Mercer Lake, just east of West Picnic Area

On Friday afternoons during the eagle nesting season, we will have interpreters at the nest viewing site to share up to date information on the nesting eagles and provide opportunities to view the nesting eagles through a spotting scope.

Feel free to pass through, or stay for the afternoon. If you are so inspired, bring your camera or paintbrush!

Questions? Email: [natureprograms@mercercounty.org](mailto:natureprograms@mercercounty.org) or call: (609) 303-0706

**All people are required to keep a minimum of 660 feet from the eagle nest.**

**Breaking this federal regulation is fineable by law.**
